attention immediately.

Acute and delayed symptoms and effects: May cause drowsiness or dizziness. May cause respiratory irritation. Signs/symptoms may include cough, sneezing, nasal discharge, headache, hoarseness, and nose and throat pain. Excessive inhalation may cause headache, dizziness,

confusion, loss of appetite and/or loss of consciousness.

contact lenses, if present and easy to do. Continue rinsing. If eye irritation

persists: Get medical advice/attention.

**Acute and delayed symptoms and effects:** Causes serious eye irritation. Signs/symptoms may include redness, swelling, pain, tearing, and blurred

or hazy vision. Isopropanol may cause transient corneal injury.

**Skin Contact:** If on skin: Wash with plenty of soap and water. Call a poison center or

doctor if you feel unwell.

**Acute and delayed symptoms and effects:** May cause skin irritation. Signs/symptoms may include localized redness, swelling, and itching.

**Ingestion:** If swallowed: Call a poison center or doctor if you feel unwell. If vomiting

occurs naturally, have victim lean forward to reduce the risk of aspiration. Do NOT induce vomiting unless directed to do so by medical personnel.

# Safety Data Sheet/Material Safety Data Sheet

Never give anything by mouth to an unconscious person. If breathing or the heart stops, trained personnel should immediately begin artificial respiration (AR) or cardiopulmonary resuscitation (CPR) respectively. Get medical attention immediately.

**Acute and delayed symptoms and effects:** May cause gastrointestinal irritation. Signs/symptoms may include abdominal pain, stomach upset,

nausea, vomiting and diarrhea.

General Advice: In case of accident or if you feel unwell, seek medical advice immediately

(show the label or SDS where possible).

Note to Physicians: Symptoms may not appear immediately. For Isopropanol intoxication, a

urine acetone test may be helpful in diagnosis. Hemodialysis should be

considered in severe cases.

## **Section 5: FIRE-FIGHTING MEASURES**

#### FLAMMABILITY AND EXPLOSION INFORMATION

Extremely flammable aerosol. Containers may explode when heated. Ruptured cylinders may rocket.

Sensitivity to Mechanical Impact: This material is not sensitive to mechanical impact.

**Sensitivity to Static Discharge:** This material is sensitive to static discharge.

**MEANS OF EXTINCTION** 

Suitable Extinguishing Media: Dry chemical or CO2. Move containers from fire area if you

can do it without risk.

Unsuitable Extinguishing Media: Not available.

**Products of Combustion:** Oxides of carbon.

**Protection of Firefighters:** Wear positive pressure self-contained breathing apparatus

(SCBA). Wear chemical protective clothing that is specifically recommended by the manufacturer. It may provide little or no thermal protection. Structural firefighters' protective clothing

will only provide limited protection.

#### Section 6: ACCIDENTAL RELEASE MEASURES

**Emergency Procedures:** As an immediate precautionary measure, isolate spill or leak area.

Keep unauthorized personnel away. Stay upwind. Many gases are heavier than air and will spread along ground and collect in low or confined areas (sewers, basements, tanks). Keep out of low areas. Ventilate closed spaces before entering. Do not touch or

walk through spilled material.

**Personal Precautions:** Use personal protection recommended in Section 8.

Environmental Precautions: Prevent entry into waterways, sewers, basements or confined

areas.

Methods for Containment: Stop leak if you can do it without risk. Do not direct water at spill

or source of leak. Use water spray to reduce vapors or divert vapor cloud drift. Avoid allowing water runoff to contact spilled material. If possible, turn leaking containers so that gas escapes

rather than liquid.

Last revision: July 2014

# **Safety Data Sheet/Material Safety Data Sheet**

**Methods for Clean-Up:** Allow substance to evaporate. Ventilate the area.

Other Information: See Section 13 for disposal considerations.

#### **Section 7: HANDLING AND STORAGE**

#### Handling:

Do not swallow. Avoid breathing mist or spray. Keep away from heat, sparks, open flames, and hot surfaces. – No smoking. Do not spray on an open flame or other ignition source. Pressurized container: Do not pierce or burn, even after use. Wash thoroughly after handling. Use only outdoors or in a well-ventilated area. See Section 8 for information on Personal Protective Equipment.

# Storage:

Store in a well-ventilated place. Store locked up. Protect from sunlight. Protect from sunlight. Do not expose to temperatures exceeding 50°C/ 122°F. Recommended storage temperature is between 5°C to 30°C (41°F to 86°F). Do not store above 40°C/ 104°F (40°C), as this will shorten the product's shelf life. Store away from incompatible materials. See Section 10 for information on Incompatible Materials. Keep out of the reach of children.

PERSONAL PROTECTIVE EQUIPMENT (PPE)

**Eye/Face Protection:** Wear safety glasses. Ensure that eyewash stations are

close to the workstation location. Use equipment for eye protection that meets the standards referenced by CSA Standard CAN/CSA-Z94.3-92 and OSHA regulations in 29

CFR 1910.133 for Personal Protective Equipment.

Hand Protection: Wear protective gloves. Consult manufacturer specifications

for further information.

**Skin and Body Protection:** Wear protective clothing.

**Respiratory Protection:** If engineering controls and ventilation are not sufficient to

control exposure to below the allowable limits then an appropriate NIOSH/MSHA approved air-purifying respirator that meets the requirements of CSA Standard CAN/CSA-Z94.4-11, with organic vapor cartridge, or self-contained breathing apparatus must be used. Supplied air breathing apparatus must be used when oxygen concentrations are low or if airborne concentrations exceed the limits of the air-

purifying respirators.

General Hygiene Considerations: Handle according to established industrial hygiene and

safety practices.
